

First International Conference on the Chemistry & Biology of Mineralized Tissues
May 3-7, 1981
Chicago, Illinois

First International Conference on the Chemistry &
Biology of Mineralized Tissues
May 3-7, 1981
Northwestern University
Dental School, Chicago, Illinois

Contents

Preface	xiii
Acknowledgments	xix
List of Participants	xxi
SECTION I: BONE, DENTIN AND CEMENTUM COLLAGENS: COMPOSITION	
Collagen Chemistry and Its Heterogeneity <i>Karl A. Piez</i>	3
Presence of ψ -Glutamyl-Phosphate in the Collagens of Bone and Other Calcified Tissues and its Absence in the Collagens of Unmineralized Tissues <i>Lola Cohen-Solal, Pierre Maroteaux and Melvin J. Glimcher</i>	7
Noncollagenous Proteins of the Gingival Matrix <i>Mustafa Kh. Dabbous</i>	13
The Synthesis and Maturation of Type I, Type V and Type α_1 (I) - Trimer Collagens in Rat Incisor Predentine <u>In Vivo</u> <i>Jaro Sodek and Susan M. Mandell</i>	19
Lysyl Hydroxylation in Bovine Type I Collagen <i>Joseph H. Lechner and Arthur Veis</i>	23
Discussion	
SECTION II: BONE, DENTIN AND CEMENTUM COLLAGENS: STABILIZATION	
New Directions in Studying Collagen Stabilization <i>Marvin L. Tanzer</i>	31
Stabilization of Bone and Dentin Collagen <i>N.D. Light and A.J. Bailey</i>	35
Qualitative and Quantitative Studies on Intermolecular Cross- Linking in Bovine Dentine Collagen <i>Paul G. Scott and Helena Edwards</i>	45
Crosslink Maturation in Bone Collagen <i>David R. Eyre</i>	51
Discussion	
SECTION III: COLLAGEN STRUCTURE AT THE MOLECULAR LEVEL	
The Molecular Structure of Collagen <i>David A. D. Parry and Alan S. Craig</i>	61
Molecular Conformation of Collagen <i>Wolfie Traub</i>	69
Collagen Structure in Tendon and Bone <i>Daniel L. Broek, Eric F. Eikenberry, Peter F. Rietzek and Barbara Brodsky</i>	79

Morphologic and Ultrastructural Changes in Bone from Experimentally Hypophosphatemic Rats <i>Barbara G. Mills and David B. N. Lee</i>	195
Differentiation of Osteoblasts and Formation of Mineralized Bone In Vitro: Requirement of Organic Phosphate <i>H.C. Tenebaum and J. N. M. Heersche</i>	199
Discussion	
SECTION VII: ORGANIC MATRIX DEFECTS IN CONGENITAL BONE DISEASE	
The Organic Matrix in Congenital Bone Disease - A Look Toward the Future <i>Edward J. Miller and Olga M. Petrovic</i>	207
Molecular Mechanisms of Abnormal Bone Matrix Formation in Osteogenesis Imperfecta <i>Peter H. Byers, Gregory S. Barsh, Karen E. Peterson, Karen A. Holbrook and David W. Rowe</i>	213
Clinical Genetic and Biochemical Heterogeneity of Osteogenesis Imperfecta <i>F. Michael Pope and Alan C. Nicholls</i>	223
α_2 HS - Glycoprotein - A Glycoprotein Present in Plasma and Bone <i>Ian R. Dickson</i>	229
Matrix Protein Difference Between Human Normal and Dentinogenesis Imperfecta Dentin <i>Yuzo Takagi and Arthur Veis</i>	233
Discussion	
SECTION VIII: THE RELATIONSHIP BETWEEN MINERAL PHASE AND ORGANIC PHASE: THE CONCEPT OF EPITAXY	
Epitaxy Down the Ages <i>James T. Irving</i>	253
Molecular Control of Tissue Mineralization <i>Aaron S. Posner and Foster Betts</i>	257
Inorganic - Organic Interrelations in Calcification: On the Problem of Correlating Electron Microscopic Observations and Mechanism <i>William J. Landis</i>	267
In Vitro Mineralization of Bovine Aorta <i>Charles L. Wadkins</i>	273
On the Question of Amorphous Calcium Phosphate in Bone Mineral <i>Marc D. Grynpas, Laurence C. Bonar and Melvin J. Glimcher</i>	279
Non-Collagenous Bone Proteins Which Affect the Solubility of Calcium Phosphates <i>J. Menanteau, W.F. Newman and M.W. Newman</i>	285
Calcification Inductors: A Comparison of Nucleational Agents in Growth Cartilage Fluid and in Predentin <i>Julio C. Pita, Luciano N. Blanco, Stephanie A. Drabin, Ake Larsson and David Howell</i>	289

The Nature and Localization of Phosphorylated Proteins of Mineralized Dentin 377
Arthur Veis, William Stetler-Stevenson, Yuzo Takagi, Boris Sabsay and Ruth Fullerton

Studies on the Chemistry and Metabolism of Dentine Proteoglycans Using In Vivo Labeling Technique 389
Firoz Rahemtulla, Charles W. Prince, Bruce Caterson, James E. Christner, John R. Baker and William T. Butler

Domain Sequences in Dentin Phosphophoryn 395
Joseph H. Lechner, Arthur Veis, and Boris Sabsay

Characterization of a Unique Dentin Glycoprotein 399
William T. Butler, Meera Bhowm, Milan Thomana, Barry Fretwell and Ralph E. Schrohenloher

Discussion

SECTION XI: BIOSYNTHESIS OF NON-COLLAGENOUS BONE AND DENTIN PROTEINS

Biosynthesis of the Non-Collagenous Proteins of the Dentin Matrix 409
Harold C. Slavkin

Biosynthesis of Extracellular Matrix in Bone: Approaches and Prospects 417
A.H. Reddi, T.K. Sampath and A.R. Hand

Odontoblast/Dentin Organ Cultures: The Biosynthesis of Matrix Protein 427
Michael T. Dimuzio, Meera Bhowm, and William T. Butler

Isolation of a Serine-Rich Low Molecular Weight Protein From Odontoblast Cultures 433
E. Christian Munksgaard and Lisbeth Larsen

Biosynthesis and Secretion of the Vitamin K-Dependent Protein by Rat Osteosarcoma Cells 439
Satoru K. Nishimoto and Paul Price

Murine Mandibular Chondrogenesis and Osteogenesis in a Serumless, Chemically Defined Medium 445
Harold C. Slavkin, Pablo Bringas, Jr., Elaine Cummings and Martin S. Groden

Effect of Vitamin D Deficiency on Osteocalcin Biosynthesis in Chick Bone 449
Jane B. Lian, Joost Frenkel and Peter V. Hanschka

Discussion

SECTION XII: INTERACTIONS BETWEEN COLLAGEN AND NON-COLLAGEN COMPONENTS

Covalent and Non-Covalent Interactions between Collagen and Non-Collagen Proteins 461
Satoshi Sasaki

Polysaccharide-Protein Interactions in Insect Cuticles: Chitin-Protein Complexes 467
John Blackwell, Louis T. Germinario and Mark A. Weik

Evidence of a Plasminogen Activator in Mineralizing Matrices <i>F. Michael Robinson and Henning Birkedal-Hansen</i>	583
Discussion	
SECTION XV: BONE INDUCTION	
Bone Induction: Introduction and Perspectives <i>A.H. Reddi</i>	593
Dentin Matrix Bone Morphogenetic Protein <i>Mark A. Conover and Marshall R. Urist</i>	597
Fibronectin and Collagenous Matrix-Induced Endochondral Bone Formation <i>Roy E. Weiss and A.H. Reddi</i>	607
Discussion	
SECTION XVI: IS THERE A COMMON ROLE OF THE ORGANIC MATRIX IN BONE AND DENTIN?	
On the Form and Function of Bone: From Molecules to Organs <i>Melvin J. Glimcher</i>	617
Discussion	
Subject Index	677
