

American Academy of Orthopaedic Surgeons

Appendix 1-F

Chemistry and Biology *of* Mineralized Tissues

Vittel, France, 1998

Editors

Michel Goldberg, DDS, PhD

Adele Boskey, PhD

Colin Robinson, PhD

Table of Contents

Exoskeletal Mineralization

Introduction	Biom mineralization: The Underlying Premises	1
	<i>Steve Weiner, PhD</i>	
Chapter 1	Physiological Mechanisms Underlying Biom mineralization Process in the Scleractinian Coral <i>Stylophora Pistillata</i>	3
	<i>Denis Allemand, PhD</i>	<i>Didier Zoccola, PhD</i>
	<i>Éric Tambutti, PhD</i>	
Chapter 2	Orchestia Cavimana as a Model to Study the Hormonal Regulation of A Calcium Storage Process	7
	<i>Gilles Luquet, PhD</i>	<i>Olivier Testenière, PhD</i>
	<i>François Graf, PhD</i>	
Chapter 3	Phosphorylation-Dependent Modulation of Calcium Carbonate Precipitation by Chicken Eggshell Matrix Proteins	13
	<i>Maxwell T. Hincke, PhD</i>	<i>Martin St. Maurice, BSc</i>
Chapter 4	Identification and Characterization of Matrix Proteins from Hen's Eggshell	19
	<i>Joel Gautron, PhD</i>	<i>Maxwell T. Hincke, PhD</i>
	<i>Marina Panheleux, PhD</i>	<i>Juan Garcia-Ruiz, PhD</i>
	<i>Yves Nys, PhD</i>	

Gene Regulation in Mineralized Tissue

Introduction	Gene Regulation of Mineralized Tissue	25
	<i>Marian Frances Young, PhD</i>	
Chapter 5	Phenotypic Variability of the Tricho-Dento-Osseous Syndrome Associated with a DLX3 Homeobox Gene Mutation	27
	<i>J. Timothy Wright, DDS, MS</i>	<i>Jennifer Price, PhD</i>
	<i>Donald Bowden, PhD</i>	<i>Katherine Kula, DDS, MS</i>
	<i>Deborah Dawson, PhD</i>	<i>Thomas C. Hart, DDS, PhD</i>
Chapter 6	Delta-Notch Signaling During Odontogenesis and After Dental Injury	33
	<i>Thimios A. Mitsiadis, DDS, PhD</i>	
Chapter 7	Regulation of BSP Gene Transcription by vSrc and Serum is Mediated Through the Inverted CCAAT Box in the Proximal Promoter	39
	<i>Richard H. Kim, PhD</i>	<i>Bernhard Ganss, PhD</i>
	<i>Jaro Sodek, PhD</i>	
Chapter 8	Zif27/Zifp60: A Member of the Zinc Finger Gene Family Expressed at Sites of Cartilage Formation in the Mouse	45
	<i>Bernhard Ganss, PhD</i>	<i>Sela Cheifetz, PhD</i>

Animal Models

Introduction	Animal Models	49
	<i>Carolyn W. Gibson, PhD</i>	
Chapter 9	Formation of Acellular Cementum but not Cellular Cementum is Inhibited in Mice Lacking Tissue Nonspecific Alkaline Phosphatase	51
	<i>Wouter Beertsen, DDS, PhD</i>	<i>Theo VandenBos, PhD</i>
	<i>Vincent Everts, PhD</i>	

Chapter 29	From Mouse to Zebrafish: Dentin Matrix Proteins Genomic Characterization <i>Charles Sfeir, DDS, PhD</i> <i>Edward Lin, DDS, MS</i> <i>Arthur Veis, PhD</i>	<i>Shannon Taylor, BS, MS</i> <i>Anne George, PhD</i>	181
Chapter 30	A Novel Glycosylated Phosphoprotein: Osteometrin <i>Hai-Yan Zhou DDS, PhD</i> <i>Jinxi Wang MD, PhD</i>	<i>Melvin J. Glimcher, MD</i> <i>Erdjan Salih, PhD</i>	185

Enamel Protein

Introduction	Enamel Matrix Proteins <i>Jennifer Kirkham, PhD</i>		189
Chapter 31	Novel Enamel Protein Kinase(s) and Phosphoproteins of Developing Enamel: Novel Methods in the Determination of Covalently-Bound Phosphate in Proteins <i>Erdjan Salih, PhD</i> <i>Mirella Gouverneur, MSc</i>	<i>John C. Huang, DMD, DMSC</i> <i>Melvin J. Glimcher, MD</i>	191
Chapter 32	Ameloblast-Specific Splicing Factors Are Not Required for Correct Splicing of Exons 3 Through 5 in Amelogenin RNA <i>Carolyn W. Gibson, PhD</i> <i>Enhong Chen, MS, MD</i>	<i>Zhi-An Yuan, MS</i>	199
Chapter 33	Cloning and Characterization of a cDNA Encoding Human EMSP1 <i>James P. Simmer, DDS, PhD</i> <i>Qibing Qian, MD, MS</i> <i>Xiaohang Cao, MD</i> <i>C-C Hu, BDS, PhD</i>	<i>Ok Hee Ryu, PhD</i> <i>Chuhua Zhang, MD</i> <i>Xiaofeng Sun, DMD, PhD</i>	205
Chapter 34	Enamel Matrix Function and The Tuft Enigma: A Role in Directing Enamel Tissue-Architecture: A Partial Sequence of Human Ameloblastin <i>Colin Robinson, PhD</i> <i>Roger C. Shore, PhD</i> <i>Simon R. Wood, PhD</i>	<i>Jennifer Kirkham, PhD</i> <i>Steven J. Brookes, PhD</i>	209

Mineral-Matrix Interactions Part I

Introduction	Mineral-Matrix Interactions: Part I <i>Adele L. Boskey, PhD</i>		215
Chapter 35	Matrix-Mediated Mineralization in Enamel and the Collagen-Based Hard Tissues <i>Antonio Nanci, PhD</i>	<i>Charles E. Smith, DDS, PhD</i>	217
Chapter 36	Nature of Hydroxyapatite Crystals Formed in the Presence of Bone Sialoprotein, Osteopontin and Synthetic Homopolymer Analogues <i>Harvey A. Goldberg, PhD</i> <i>Michelle A. Mundy, BSc</i> <i>Marc D. McKee, PhD</i>	<i>Graeme K. Hunter, PhD</i> <i>Kevin J. Warner, BSc, MSc</i>	225
Chapter 37	Tissue Transglutaminase Treatment Increases Osteopontin's Collagen Binding Properties and Results in Affinity for Tropoelastin <i>Mari T. Kaartinen, PhD</i> <i>Annikka Liinamaa-Kaukkunen, PhD</i>	<i>Arja Pirhonen, PhD</i> <i>Pekka H. Mäntypää, MD</i>	229
Chapter 38	Sodium-Calcium Exchanger Isoforms in Odontoblast-Like Cell Lines MDPC-23 and MMP4 <i>Patrik Lundquist, MSc</i> <i>Amel Gritli-Linde, DDS, PhD</i> <i>Helena Ritchie, PhD</i>	<i>Ted Lundgren, DDS, OD</i> <i>Carl T. Hanks BS, DDS, PhD</i> <i>Anders Linde, MSc, DDS, OD</i>	233

Mineral-Matrix Interactions: Part II

Introduction	Mineral-Matrix Interactions: Part 2 <i>Anders Lindé, MSc, DDS, OD</i>	237
Chapter 39	Bcl-2 Family Regulation of Apoptosis in Association With Mineralization of the Osteoblast Extracellular Matrix: Influence of Glucocorticoids <i>Mariela Jaskelioff, BS</i> <i>Elizabeth Buffone, BS</i> <i>Gary S. Stein, PhD</i>	239
	<i>Hicham Drissi, PhD</i> <i>Janet L. Stein, PhD</i> <i>Jane B. Lian, PhD</i>	
Chapter 40	Studies of Adhesion and Signal Transduction Through Localization of Bone Proteins by 3-Dimensional Immunocytochemistry <i>William J. Landis, PhD</i> <i>Karen J. Hodgens, MS</i> <i>Arthur R. Hand, PhD</i> <i>Karolyn Buttle, BA</i>	243
	<i>Cameron H. Owen, PhD</i> <i>Diana Block, BA</i> <i>Gloria Gronowicz, PhD</i> <i>Michael Marko, BS</i>	
Chapter 41	Extracellular Matrix Regulation of Osteoblast-Specific Gene Expression: Role of the $\alpha 2\beta 1$ Integrin and <i>Osf2/Cbfa1</i> Activation <i>Renny T. Franceschi, PhD</i> <i>Di Jiang, MS</i> <i>M. Douglas Benson, MS</i>	249
	<i>Guozhi Xiao, MD, PhD</i> <i>Peedikayil Thomas, PhD</i>	

Bone Cell Biology

Introduction	Bone Cell Biology <i>Jane B. Lian, PhD</i>	255
Chapter 42	The 3/A/11D-1 Endochondral Bone Forming Cell Line: An Investigation Model of Cell Plasticity Between Cartilage and Bone <i>Aline Cohen-Tanugi, PhD</i> <i>Nadine Forest, DDS, PhD</i>	257
	<i>Christine Foll</i>	
Chapter 43	Identification of Genes Downregulated During the Osteogenic Differentiation of Vascular Pericytes <i>Alan C. Wood, PhD</i> <i>Heather Nield, PhD</i> <i>Raymond P. Boot-Handford, PhD</i>	263
	<i>Bethan Harvey, BSc</i> <i>Mary Jo Doherty, PhD</i> <i>Ann E. Canfield, PhD</i>	
Chapter 44	Potential Mineralization by Osteocyte-Like Cell Lines <i>Lynda Bonewald, PhD</i> <i>Nancy P. Camacho, PhD</i>	267
	<i>Adele L. Boskey, PhD</i> <i>Yoichi Kato, PhD</i>	
Chapter 45	Inositolphosphoglycans: Novel Mediators of Bone Turnover? <i>Carol Elizabeth Evans, BSc, PhD</i> <i>Charles Samuel Bernard Galasko, MSc, FRCS</i>	271
	<i>Carol Ann Ward</i> <i>Gail Tessa Fruma Galasko, BSc, MSc, PhD</i>	

Mechanical Adaptation

Introduction	Mechanical Adaptation of Bone <i>Ermanno Bonucci, MD</i>	275
Chapter 46	Relation Between Structure and Microstrains in Cortical Bone <i>Christine Leterrier, PhD</i> <i>Paul Constantin</i> <i>Jean-Pierre Blanquie</i>	277
	<i>James Grayson</i> <i>Nicolas Rippe</i> <i>Yves Nys, PhD</i>	

Chapter 47	Mechanical Properties – Structure Relations of Parallel-Fibered and Lamellar Bone: In-Plane Anisotropy <i>Danmei Liu, PhD</i> <i>H. Daniel Wagner, PhD</i>	281 <i>Vivi Ziv, PhD</i> <i>Steve Weiner, PhD</i>
Chapter 48	Rapid Release of Nitric Oxide in Response to Mechanical Stress by Bone Cells Grown from Adult Mouse Long Bone Fragments <i>Kazuhisa Soejima, DDS</i> <i>Cornelis M. Semelins, BA</i>	287 <i>Jenneke Klein-Nulend, PhD</i> <i>Elisabeth H. Burger, PhD</i>
Chapter 49	A Novel System for the Controlled Application of Physiological Cyclic Mechanical Strains to Osteoblasts In Vitro <i>Frazer G. Smith, BSc</i>	291 <i>Richard M. Aspden, PhD, DSc</i>

Dentin and Cementum

Introduction	Dentin and Cementum <i>Martha J. Somerman, DDS, PhD</i>	295
Chapter 50	New Insights on the Dynamics of Dentin Formation <i>Michel Goldberg, DDS, PhD</i> <i>Maria-Angelica Torres-Quintana, DDS, PhD</i> <i>Rachel Hall, DDS, PhD</i> <i>Suzanne Menachi, PhD</i>	297 <i>Dominique Septier</i> <i>Sylvie Lécolle</i> <i>Gabriella Gafni, PhD</i> <i>Graham Embery, PhD</i>
Chapter 51	Distribution of Small Keratan Sulfate Proteoglycans in Predentin and Dentin <i>Mitsuo Yamauchi, DDS, PhD</i> <i>Elton P. Katz, PhD</i> <i>Konstantinos Verdolis, DDS</i>	305 <i>Katsuhiko Uzawa, DDS, PhD</i> <i>Maria Manuela Lopes, BS</i> <i>Hui Cheng, DDS, MS</i>
Chapter 52	Defining the Cementoblast: In Situ to In Vitro <i>Martha J. Somerman, DDS, PhD</i> <i>Hongjiao J. Ouyang, DDS</i> <i>Laurie K. McCouley, DDS, PhD</i> <i>Kate Barald, MS, PhD</i>	311 <i>Jan E. Berry, BS</i> <i>Christopher L. Strayhorn, BA</i> <i>N. Esra Saygin, DDS, PhD</i> <i>John A. D'Errico, MS, PhD</i>
Chapter 53	Mouse DSPP Gene Regulation and Evidence for a Single Gene <i>Mary MacDougall, PhD, DDS</i> <i>Ting Ting Gu, MD</i>	317 <i>Darrin Simmons, BA</i> <i>Jian Q. Feng, MD, PhD</i>

Cartilage

Introduction	Cartilage <i>Helmtrud Isolde Roach, BA, MSc, PhD</i>	323
Chapter 54	Programmed Cell Death of Chondrocytes in Vivo: Apoptosis, Dark Chondrocytes, and Cell Paralysis <i>Helmtrud Isolde Roach, BA, MSc, PhD</i>	325 <i>Nicholas Michael Parry Clarke, ChM, FRCS</i>
Chapter 55	Metabolic Regulation of Apoptosis in Epiphyseal Chondrocytes <i>Ramesh Rajpurahit, PhD</i> <i>Kyle Mansfield, BS</i>	331 <i>Hideyuki Hariguchi, DMD</i> <i>Irving M. Shapiro, BDS, PhD</i>
Chapter 56	Cartilage and Alveolar Bone Formation <i>Catharina Ellerström, DDS, PhD</i> <i>Carin Lundmark, BSc</i>	335 <i>Cecilia Christerson, BSc</i> <i>Tilmann Wartz, PhD</i>

Chapter 57	Arachidonic Acid Is a Negative Regulator of 24, 25-Dihydroxyvitamin D₃ Action in Resting Zone Chondrocytes <i>Zvi Schwartz, DMD, PhD</i> <i>Douglas Curry, DDS, MS</i> <i>Barbara D. Boyan, PhD</i>	<i>Victor L. Sylvia, PhD</i> <i>David D. Dean, PhD</i>	339
-------------------	--	---	------------

Matrix Degradation

Introduction	Matrix Degradation <i>David R. Eyre, PhD</i>		345
Chapter 58	Biochemical Markers of Bone and Cartilage Collagen Degradation <i>David R. Eyre, PhD</i> <i>Ping Shao, BS</i> <i>Kathy Shaffer, BS</i> <i>J. Daniel Clemens, MS</i>	<i>Lynne M. Arley, PhD</i> <i>Kristin Vosberg-Smith, BS</i> <i>Vincent Ochs, BS</i>	347
Chapter 59	Matrix Metalloproteinase-2 in Dentinogenesis <i>Masanori Satoyoshi, DDS, PhD</i> <i>Toshio Teranaka, DDS, PhD</i> <i>Yuko Mikumi-Takagaki, PhD</i>	<i>Tadahiko Koizumi, DDS, PhD</i> <i>Shigero Saito, DDS, PhD</i>	351
Chapter 60	Expression of Proteinase mRNAs in Bovine Root-Resorbing Tissue <i>Busayarat Linsuwanont, DDS</i> <i>Yuzo Takagi, DDS, PhD</i>	<i>Hisako Katano, DDS, PhD</i> <i>Hitoyata Shimokawa, DDS, PhD</i>	357
Chapter 61	The Structure and Function of Enamelysin (MMP-20) <i>Ok Hee Ryu, PhD</i> <i>C-C Hu, BDS, PhD</i> <i>Xiaohang Cao, MD</i> <i>James P. Simmer, DDS, PhD</i>	<i>Debra T. Hsiung</i> <i>Xiaoling Sun, DMD, PhD</i> <i>John D. Bartlett, PhD</i>	363

Pathology and Therapeutics

Introduction	Pathology and Therapeutics <i>Antonio Nanci, PhD</i>		369
Chapter 62	Dissection of Pathways for Transport of Tartrate-Resistant Acid Phosphatase in Osteoclasts by Use of Osteopetrotic Rat Mutations <i>Göran Andersson, PhD</i> <i>Kjell Hulthén, PhD</i> <i>Finni P. Reinhold, MD, PhD</i>	<i>Maria Norgård, BSc</i> <i>Marc D. McKee, PhD</i> <i>Sandy C. Marks, Jr, DDS, PhD</i>	371
Chapter 63	Thrombospondin Expression by Calcifying and Noncalcifying Vascular Cells <i>Claire Farrington, BSc</i> <i>Ann E. Canfield, PhD</i>	<i>Anthony M. Heagerty, MD, FRCP</i>	377
Chapter 64	Tendon and Ligaments in the Etiology of Osteoarthritis: The Role of Collagen and Mineralization <i>Janet M. Anderson-MacKenzie, PhD</i> <i>Allen J. Bailey, PhD, DSc</i>	<i>Michael E. Billingham, PhD</i>	383
Chapter 65	Growth-Stimulatory Factors as Promoters of Bone Formation in Well-Defined Experimental Rat Models <i>Göran Zellin, DDS, OD</i>	<i>Anders Lindé, MSc, DDS, OD</i>	387
Chapter 66	Thermally Triggered Mineralization of Enamel and Dentin Using Calcium and Phosphate Loaded Liposomes <i>William L. Murphy, BS</i>	<i>Phillip B. Messersmith, PhD</i>	393
