

# FIFTH INTERNATIONAL CONFERENCE ON THE CHEMISTRY AND BIOLOGY OF MINERALIZED TISSUES

Kohler, Wisconsin, USA, October 22–27, 1995

*Organized and Edited by*

**Adele L. Boskey and Barbara D. Boyan**

GORDON AND BREACH SCIENCE PUBLISHERS

*Cover Photograph: A volume-rendered image of crystals in mineralizing turkey tendon collagen. Major periodic banding is evident. The crystals are all aligned and have their crystallographic c-axes parallel to the collagen fibril axis. Crystals are located within the hole zones but clearly extend across the overlap zones. Reprinted with permission from W. J. Landis, M. J. Song, A. Leith, L. McEwen and B. F. McEwen. J. Structural Biology 110: 39–54 (1993).*

# Contents

Preface	xiii
List of Conference Officers	xv
List of Participants	xvii

## SESSION I

### *STRUCTURE OF MINERAL IN VERTEBRATES AND INVERTEBRATES*

---

<b>W. J. Landis:</b> Mineral Characterization in Calcifying Tissues: Atomic, Molecular and Macromolecular Perspectives	239 [1]
<b>P. Fratzl, S. Schreiber and K. Klaushofer:</b> Bone Mineralization as Studied by Small-Angle X-Ray Scattering	247 [9]
<b>J. Aizenberg, M. Ilan, S. Weiner and L. Addadi:</b> Intracrystalline Macromolecules are Involved in the Morphogenesis of Calcitic Sponge Spicules	255 [17]
<b>G. Lambert and C. C. Lambert:</b> Spicule Formation in the New Zealand Ascidian <i>Pyura pachydermatina</i> (Chordata, Ascidiacea)	263 [25]
<b>J. T. Wright, K. I. Hall, T. G. Deaton and J. -D. Fine:</b> Structural and Compositional Alteration of Tooth Enamel in Hereditary Epidermolysis Bullosa	271 [33]

## ABSTRACTS

<b>S. J. Gadaleta, W. J. Landis, N. P. Camacho, R. Mendelsohn and A. L. Boskey:</b> Polarized Fourier Transform Infrared Microscopy of Calcified Turkey Leg Tendon	281 [43]
<b>W. J. Landis, B. L. Hay Kraus and C. A. Kirker-Head:</b> Vascular-Mineral Spatial Correlation in the Normally Calcifying Turkey Leg Tendon: A Study by Two- and Three-Dimensional Imaging Methods	282 [44]
<b>K. Probst, S. Lees and E. Page:</b> Comparative Ultrastructure Between Mineralized Turkey Leg Tendon (MTLT) and Bones	283 [45]
<b>H. J. Höhling, U. Plate, R. H. Barckhaus and H. P. Wisemann:</b> Analysis of a General Principle of the Earliest Crystal Formation in Relation to the Matrix Macromolecules	284 [46]
<b>M. D. Grynopas, T. M. Boyce and M. B. Schaffler:</b> A Possible Relation Between Changes in Bone Mineralization With Age and Bone Fragility	285 [47]
<b>V. Ziv, W. Traub and S. Weiner:</b> Relations Between Bone Micro-Structure and Mechanical Properties	286 [48]
<b>E. P. Paschalis, E. Dicarolo, F. Betts, R. Mendelsohn, A. L. Boskey:</b> FT-IR Microscopic Analysis of Human Iliac Crest Biopsies From Normal Bone	287 [49]

<b>F. J. G. Cuisinier, P. Steuer and J. C. Voegel:</b> Bone and Enamel Crystal Growth Mechanisms Studied by High Resolution Electron Microscopy	288 [50]
<b>H.-M. Kim, C. Rey and M. J. Glimcher:</b> Isolation of Calcium-Phosphate Crystals of Bone by Non-Aqueous Methods at Low Temperature	289 [51]
<b>E. Honda, A. Ito, M. Aoki, K. Inoue, M. Yazaki and S. Mizushima:</b> Process of Brain Stone Formation in FAHR Disease (Progressive, Symmetrical, Non-Arteriosclerotic, Calcifying, Cerebral Microvasculopathy)	290 [52]
<b>M. B. Saffo:</b> Oxalate-Urate Deposits in Marine Chordate Animals	291 [53]
<b>I. Sasagawa and J. Akai:</b> Fine Structure of the Mineralization in Tooth Enameloid of Elasmobranches	292 [54]

## SESSION II

*GENES & GENE REGULATION OF EXTRACELLULAR MATRIX PROTEINS*

---

<b>L. J. Sandell:</b> Genes and Gene Regulation of Extracellular Matrix Proteins: An Introduction	1 [55]
<b>P. Ducy, V. Geoffroy and G. Karsenty:</b> Study of Osteoblast-Specific Expression of One Mouse Osteocalcin Gene: Characterization of the Factor Binding to OSE2	7 [61]
<b>J. B. Lian, G. S. Stein, J. L. Stein, A. Van Wijnen, L. McCabe, C. Banerjee and H. Hoffmann:</b> The Osteocalcin Gene Promoter Provides a Molecular Blueprint for Regulatory Mechanisms Controlling Bone Tissue Formation: Role of Transcription Factors Involved in Development	15 [69]
<b>J. Sodek, J. J. Li, R. H. Kim, Y. Ogata and M. Yamauchi:</b> Characterization of the Bone Sialoprotein (BSP) Gene Promoter	23 [77]
<b>J. Chen, J. Sodek, H. F. Thomas and D. M. Ranly:</b> Dexamethasone Stimulates Luciferase Gene Expression Through the Rat Bone Sialoprotein Gene Promoter in Transgenic Mice	33 [87]
<b>M. L. Snead, M. L. Paine, L.-S. Chen, B. Y. W. Luo, D. H. Zhou, Y. -P. Lei, Y. -H. Liu and R. E. Maxson, Jr.:</b> The Murine Amelogenin Promoter: Developmentally Regulated Expression in Transgenic Animals	41 [95]

## ABSTRACTS

<b>B. Guo, H. Merriman, M. Montecino, C. Banerjee, A. Van Wijnen, J. B. Lian, J. L. Stein and G. S. Stein:</b> Osteoblast Growth and Differentiation: Transcriptional Control of Genes for Competency of Osteoblast Phenotype Development is Mediated by Modifications of Nuclear Structure	49 [103]
<b>C. Brandsten, I. Slaby, L. Hammarström and T. Wurtz:</b> Isolation of a Novel Rat mRNA Sequence Expressed in Osteoblasts, Odontoblasts and Ameloblasts	50 [104]
<b>R. Yang, T. Uporova and L. C. Gerstenfeld:</b> Comparative Analysis of the Mechanisms of Regulation of the Osteopontin and Bone Sialoprotein Genes	51 [105]
<b>R. A. Saavedra, S. K. Kimbro, J. Schnuer, and C. I. Ljubetic:</b> Gene Expression and Regulation of Osteopontin	52 [106]

<b>R. H. Kim, J. J. Li, Y. Ogata, M. Yamauchi, L. P. Freedman, and J. Sodek:</b> Identification of a Vitamin D-Response Element (VDRE) That Overlaps a Unique Inverted TATA Box in the Rat Bone Sialoprotein (BSP) Gene	53 [107]
<b>C. D. Toma, J. L. Schaffer, S. Ashkar and L. C. Gerstenfeld:</b> Mechano-Induction of Osteopontin Gene Expression Does Not Require <i>De Novo</i> Protein Synthesis	54 [108]
<b>Y. Ogata, N. Niisato, H. Sugiya, S. Cheifetz, R. H. Kim and J. Sodek:</b> Regulation of Rat Bone Sialoprotein (BSP) Gene Transcription by Transforming Growth Factor b1 (TGF- $\beta$ )	55 [109]
<b>M. Yamauchi, Y. Ogata, R. H. Kim, J. J. Li and J. Sodek:</b> Interaction Between AP-1 and the Glucocorticoid Receptor (GR) With Overlapping Response Elements in the Rat Bone Sialoprotein (BSP) Gene Promoter	56 [110]
<b>M. Takigawa, T. Nakanishi, Y. Kimpura, T. Murakami, T. Tamura, T. Hattori, K. Takahashi, F. Suzuki and J.-D. Zhu:</b> A Human Chondrosarcoma-Derived Chondrocytic Cell Line (HCS-2/8) Expresses Various Known and Unknown Cartilage Specific Genes	57 [111]
<b>E. Chen, P. Collier, S. Decker, R. Piddington, G. Harrison, Z. A. Yuan and C. W. Gibson:</b> Transgenic Mice That Express Diphtheria Toxin in Ameloblasts	58 [112]
<b>P. H. Kresbach, S. K. Lee, Y. Matsuki, K. M. Yamada and Y. Yamada:</b> Cloning and Expression of Ameloblastin, a Novel Ameloblast-Specific Gene	59 [113]
<b>I. Slaby, R. Cerny', C. D. Fong, L. Hammarström and T. Wurtz:</b> Expression of a Novel MRNA in Rat Ameloblasts	60 [114]
<b>F. P. Reinholt, T. Karlsson, M. Wendel and D. Heinegard:</b> Immunolocalization of a Recently Isolated 63 kDa Bone Protein	61 [115]

## SESSION III

*CELL BIOLOGY OF CALCIFIED TISSUES*

---

<b>B. D. Boyan, V. L. Sylvia, D. D. Dean and Z. Schwartz:</b> Cell Biology of Calcified Tissues: Experimental Models of Differentiation and Mechanisms by Which Local and Systemic Factors Exert their Effects	63 [117]
<b>S. Cheifetz, I. W. S. Li, C. A. G. McCulloch, K. Sampath and J. Sodek:</b> Influence of Osteogenic Protein-1 (OP-1;BMP-7) and Transforming Growth Factor- $\beta$ 1 on Bone Formation <i>In Vitro</i>	71 [125]
<b>M. Mina, J. Gluhak and B. Rodgers:</b> Downregulation of <i>Msx-2</i> Expression Results in Chondrogenesis in the Medial Region of the Avian Mandible	79 [133]
<b>H. I. Roach and Je. Erenpreisa:</b> The Phenotypic Switch from Chondrocytes to Bone-Forming Cells Involves Asymmetric Cell Division and Apoptosis	85 [139]
<b>J. E. Dennis and A. I. Caplan:</b> Analysis of the Developmental Potential of Conditionally Immortal Marrow-Derived Mesenchymal Progenitor Cells Isolated from the H-2K <sup>b</sup> -tsA58 Transgenic Mouse	93 [147]
<b>Z. Schwartz, V. L. Sylvia, D. D. Dean and B. D. Boyan:</b> The Synergistic Effect of TGF $\beta$ and 24,25-(OH) <sub>2</sub> D <sub>3</sub> on Resting Zone Chondrocytes is Metabolite-Specific and Mediated by PKC	101 [155]

- J. G. Meszaros, N. J. Karin and M. C. F.-Carson:** Voltage-Sensitive Calcium Channels in Osteoblasts: Mediators of Plasma Membrane Signalling Events 107 [161]

#### ABSTRACTS

- B. D. Boyan, V. Sylvia, D. D. Dean, M. Luna and Z. Schwartz:** Nongenomic Regulation of Extracellular Matrix Events by Vitamin D<sub>3</sub> Metabolites is Mediated by Protein Kinase C-Zeta 113 [167]
- J. L. Davideau, D. Hotton, P. Papagerakis and A. Berdal:** Developmental Control of 1,25(OH)<sub>2</sub> Vitamin D<sub>3</sub> Receptor Gene Expression: A Potential Pathway for the Regulation of Stage-Specific Responsiveness of Target-Genes in Mineralized Tissues 114 [168]
- D. Nebgen, B. Sabsay, H. Inoue and A. Veis:** The Chondrogenic Inducing Activity From Bovine Dentin is Related to a Transcriptional Activating Factor, Not To TGF- $\beta$  or DVR/BMP 115 [169]
- J. Wang and M. J. Glimcher:** Temporal and Spatial Independence of Bone and Cartilage Induction by Demineralized Bone Powder in Cranial Defects and Subcutaneous Tissues of Rats 116 [170]
- A. K. Majors, L. A. Ehrhart and G. Muschler:** Basic Fibroblast Growth Factor Enhances Proliferation and Reversibly Inhibits Osteoblastic Differentiation of Human Bone Marrow Stromal Cells in Primary Culture 117 [171]
- N. Suzuki, E. Oikawa, M. Maeno and K. Otsuka:** Age-Related Effect of TGF- $\beta$  and 1,25VD<sub>3</sub> on Human Alveolar Bone Cells 118 [172]
- N. Suzuki, E. Oikawa, M. Maeno and K. Otsuka:** Localization of PA and PAI in Bone and Those Production by Bone Cells 119 [173]
- E. Smith, K.-T. Tang, S. M. Pockwinse, J. L. Stein, J. B. Lian, and G. S. Stein:** Regulation of Cell Growth Control Contributes to Mineralization of the Bone Extracellular Matrix 120 [174]
- H. I. Roach and B. E. Scammell:** New Insights Into Fracture Repair: The Contribution of "Intra-Lacunar" Bone to the Formation of Hard Callus 121 [175]
- R. Liu, M. C. F.-Carson and N. J. Karin:** Sphingolipid-Mediated Release of Calcium From Intracellular Stores in MC3T3-E1 Osteoblasts 122 [176]
- L. C. Gerstenfeld, C. D. Toma, C. D. Lieberman and J. L. Schaffer:** Variation in Phenotypic Properties of Osteoblasts Prepared From Chicken Embryos of Different Developmental Ages 123 [177]
- Y. M.-Takagaki, Y. Suzuki, T. Kawase and S. Saito:** Osteocytic Cells are the Sensor of Mechanical Stress 124 [178]
- S. B. Doty, A. Boskey, and I. Binderman:** The Effect of Spaceflight on Bone and Cartilage Cell Differentiation 125 [179]
- P. Papagerakis, M. Peuchmaur, D. Hotton, L. Ferkdadj, S. Sasaki, T. Takagi, L. Malaval and A. Berdal:** Identification of Mixed Amelo-Odonto-Osteoblastic Cell-Types Suggests a Potential Role for Epithelium-Mesenchyme Transition in Human Odontogenic Tumors 126 [180]
- H. F. Thomas, C. Terzoglou, and M. Mina:** Response of Human Pulpal Cells of Calcitonin Gene Related Peptide 127 [181]

<b>R. L. Macneil, J. Berry, C. Straiyhorn, B. Piotrowski, J. D'errico and M. Somerman:</b> Expression of Osteopontin, Bone Sialoprotein and Collagen Types I and XII During Later Stages of Tooth-Root Development	128 [182]
<b>A. G.-Line, J.-V. Ruch and A. Lind:</b> Polyamine Depletion-Mediated Effects on Murine Odontogenesis are Dependent on Tooth Developmental Stage and Culture Conditions	129 [183]
<b>M. Z.-David, H. P. Vo, J. Reyna, P. Hsu, T. Wang, F. Thiemann and H. C. Slavkin:</b> The "Other" Enamel Proteins	130 [184]

## SESSION IV

*MATRIX PROTEIN STRUCTURE AND FUNCTION*

<b>P. G. Robey:</b> Vertebrate Mineralized Matrix Proteins: Structure and Function	131 [185]
<b>J. P. Gorski, E. A. Kremer and Y. Chen:</b> Bone Acidic Glycoprotein-75 Self-Associates to form Large Macromolecular Complexes	137 [191]
<b>P. J. Neame and W. T. Butler:</b> Posttranslational Modification in Rat Bone Osteopontin	145 [199]
<b>A. G. Fincham and J. M.-Oldak:</b> Comparative Mass Spectrometric Analyses of Enamel Matrix Proteins from Five Species Suggest a Common Pathway of Post-Secretory Proteolytic Processing	151 [205]
<b>M. L. Paine, D. Deutsch and M. L. Snead:</b> Carboxyl-Region of Tufelin Mediates Self-Assembly	157 [211]
<b>G. Andersson and E.-K. Johansson:</b> Adhesion of Human Myelomonocytic (HL-60) Cells Induced by 1,25-dihydroxyvitamin D <sub>3</sub> and Phorbol Myristate Acetate is Dependent on Osteopontin Synthesis and the $\alpha_v\beta_3$ Integrin	163 [217]

## ABSTRACTS

<b>R. Fujisawa, M. Mizuno and Y. Kuboki:</b> Construction of Artificial Hydroxyapatite-Binding Proteins	173 [227]
<b>Y. Gotoh, E. Salih, M. J. Glimcher, and L. C. Gerstenfeld:</b> Characterization of the Major Non-Collagenous Proteins of Chicken Bone: Identification of a Novel 60 kDa Non-Collagenous Protein	174 [228]
<b>S. Ashkar, L. C. Gerstenfeld, and M. J. Glimcher:</b> The Effect of Osteopontin on Cell Adhesion and Migration	175 [229]
<b>L. J. Riggan, G. J. Pinero and W. T. Butler:</b> The Nature of Molecular Variants of Rat Dentin Phosphoprotein	176 [230]
<b>J. Dillon, B. Sabsay and A. Veis:</b> The Preparation and Characterization of Antibodies to Phosphorylated and Dephosphorylated Rat Incisor Phosphophoryn	177 [231]
<b>S. Dahlin and A. Linde:</b> Metal Ion Binding to Rat Incisor Dentine Phosphoprotein	178 [232]
<b>J. S. Evans:</b> NMR and Molecular Dynamics Studies of the Temperature, Solvent, and Cation-Dependent Tertiary Structure of Bovine Dentine Phosphophoryn	179 [233]

- N. J. Reeves and J. S. Evans:** "CHASM": An Algorithm for Predicting Polymer and Polypeptide Conformations at Inorganic Interfaces 180 [234]
- J. S. Evans:** Dihedral Probability Grid Monte-Carlo Conformational Search: A Method for Biom mineralization Polypeptide Solution Structure Prediction 181 [235]
- M. Wendel, Y. Sommarin and D. Heinegård:** A Novel 85 kDa Protein From Bone is Structurally Related to Leucine-Rich Repeat Proteoglycans 182 [236]

## SESSION V

*ENZYMES IN MINERALIZING SYSTEMS*

- 
- E. E. Golub:** Enzymes in Mineralizing Systems: State of the Art 183 [237]
- T. M. Litchfield and G. R. Sauer:** Metallothionein Induction in Calcifying Growth Plate Cartilage Chondrocytes 189 [243]
- M. D. McKee and A. Nanci:** Osteopontin: An Interfacial Extracellular Matrix Protein in Mineralized Tissues 197 [251]
- E. Salih, S. Ashkar, H. -Y. Zhou, L. Gerstenfeld and M. J. Glimcher:** Protein Kinases of Cultured Chicken Osteoblasts That Phosphorylate Extracellular Bone Proteins 207 [261]
- C. Sfeir and A. Veis:** The Membrane Associated Kinases which Phosphorylate Bone and Dentin Extracellular Matrix Phosphoproteins are Isoforms of Cytosolic CKII<sup>1</sup> 215 [269]
- Y. Suzuki, T. Kubota, T. Koizumi, M. Satoyoshi, T. Teranaka, T. Kawase, T. Ikeda, A. Yamaguchi, S. Saito and Y. M.-Takagaki:** Extracellular Processing of Bone and Dentin Proteins in Matrix Mineralization 223 [277]
- J. M.-Oldak, P. E. Sarte and A. G. Fincham:** Description of Two Classes of Proteinases from Enamel Extracellular Matrix Cleaving a Recombinant Amelogenin 231 [285]

## ABSTRACTS

- I. Binderman, D. Stiner, S. B. Doty and A. L. Boskey:** Indirect Evidence for the Existence of a Matrix Phosphoprotein Kinase in Mineralizing Chondrocyte Cultures 239 [293]
- E. Salih, S. Ashkar, L. C. Gerstenfeld and M. J. Glimcher:** Phosphorylation Sites of Secreted <sup>32</sup>P-Labeled Osteopontin From Cultured Chicken Osteoblasts 240 [294]
- P. T. Guidon, Jr. and A. M. McGlone:** PGE<sub>1</sub> Blocks TPA-Stimulated MMP Production by HIG-82 Cells 241 [295]
- R. M. Grumbles, L. Wenger and D. S. Howell:** The Regulation of Hepatocyte Growth Factor in Chondrocytes and its Regulation of Rat Collagenase and TIMP Gene Expression 242 [296]
- B. Larsson, A. Linde and S. Dahlin:** Purification and Characterization of Alkaline Phosphatase From Rat Incisor Odontoblasts 243 [297]
- J. H. M. Wöltgens, D. M. Lyarum and A. L. J. J. Bronckers:** *In Vitro* Regulation of Phosphate Uptake by Alkaline Phosphatase in Hamster Tooth Germs 244 [298]
- E. Salih, H.-Y. Zhou and M. J. Glimcher:** Identification of an Atypical Thrombin Cleavage Site of Purified Bovine Bone Sialoprotein 245 [299]

- Y. Liu, D. D. Dean, J. Schlimmer, S. Searle, A. Todd, Y. Zhao, Z. Schwartz and B. D. Boyan:** Proteolipid Synthesis is Regulated by Conditions Favoring Calcification of *Corynebacterium Matruchotii* 246 [300]
- S. A. Shapses and S. K. Fried:** Lipoprotein Lipase in Articular Cartilage and Growth Plate 247 [301]

## SESSION VI

**CALCIFIED TISSUE PATHOLOGY AND THERAPEUTICS**

- 
- R. J. Wenstrup, D. P. Witte and J. B. Florer:** Abnormal Differentiation in MC3T3-E1 Preosteoblasts Expressing a Dominant-Negative Type I Collagen Mutation 249 [303]
- N. P. Camacho, W. J. Landis and A. L. Boskey:** Mineral Changes in a Mouse Model of Osteogenesis Imperfecta Detected by Fourier Transform Infrared Microscopy 259 [313]
- M. MacDougall, T. T. Gu and D. Simmons:** Dentin Matrix Protein-1, A Candidate Gene for Dentinogenesis Imperfecta 267 [321]
- D. C. Hervey, S. N. Popoff and S. C. Marks, Jr.:** Reduced Bone Resorption In *Toothless* (Osteopetrotic) Rats—An Abnormality of Osteoblasts Related to Their Inability to Activate Osteoclast Activity *In Vitro* 273 [327]
- G. Zellin, E. Hedner and A. Linde:** Bone Regeneration by a Combination of Osteopromotive Membranes with Different BMP Preparations: A Review 279 [333]

## ABSTRACTS

- S. Suga and T. Aoba:** Morphology, Chemistry, and Structure of Vertebrate Tooth Tissues 285 [339]
- D. M. Lyaruu, M. A. van Duin, T. J. M. Bervoets, J. H. M. Wöltgens and A. L. J. J. Bronckers:** Effect of Daunorubicin on the Developing Hamster Tooth Germ *In Vitro* 286 [340]
- Y. Takagi, H. Katano, H. Fujita, T. Kuroda and H. Shimokowa:** Immunochemical and Biochemical Studies of Enamel Proteins in Teeth Suffered From Hypocalcified Amelogenesis Imperfecta 287 [341]
- J. Kirkham, C. Robinson, W. A. Bonass, R. C. Shore and S. J. Brookes:** Enamel Dysplasias and the Role of Serum Albumin 288 [342]
- J.-C. Farges, A. Joffre, H. Lesot, F. Bleicher, and H. Magloire:** Immunocytochemical Localization of Fibronectin and a 165 kDa Membrane Protein in the Human Odontoblast Layer Under Initial Carious Lesions 289 [343]
- A. I. Caplan:** Mesenchymal Stem Cells and Their Use in Regenerating Cartilage and Subchondral Bone 290 [344]
- H. Takita, E. Tsuruga, D. Kobayashi and Y. Kuboki:** Synergistic Effect Between rhBMP-2 and the Partially Purified BMPs in Ectopic Bone Formation 291 [345]
- Y. Sasano, I. Mizoguchi, I. Takahashi, M. Kagayama, T. Saito, and Y. Kuboki:** BMPs Induce Intramembranous and/or Endochondral Ossification in Ectopic Sites Depending on the Physicochemical Property of the Carrier 292 [346]
- Y. Kuboki, T. Saito, M. Murata, E. Tsuruga, D. Kobayashi, H. Takita, M. Mizuno and N. Nagai:** Effect of Geometrical Factors of Carriers in BMP-Induced Chondro- and Osteogenesis, Topobiology of Bone Formation 293 [347]

<b>P. Filippini, S. Cristallini, E. Rizzello, G. Policani, F. Gregorio, L. Fedeli, S. Boldrini, S. Troiani and C. Massoni:</b> Long-Term Cyclical Intravenous Clodronate Increases Spine Bone Density in Postmenopausal Osteoporosis: Effect on New Vertebral Fractures	294 [348]
<b>P. Filippini, S. Cristallini, E. Rizzello, G. Policani, F. Gregorio, S. Boldrini, S. Troiani, C. Massoni and L. Fedeli:</b> Performance of New Markers of Bone Turnover in Detecting Early Post-Menopausal Bone Loss and Monitoring Response to Alendronate	295 [349]
<b>K. P. H. Pritzker, J.-Y. Lee and M. Mendes:</b> Tetracycline Surfaces Can Exceed Osteoid Surfaces: Implications for Bone Mineralization	296 [350]
<b>W. Traub, T. Arad, U. Vetter and S. Weiner:</b> Bone Ultrastructure in Osteogenesis Imperfecta	297 [351]
<b>Y. Sato, H. Okada, H. Yamamoto, T. Sakae and R. Z. Legeros:</b> Bone Structure and Composition of the Osteopetrotic (OP/OP) Mouse	298 [352]
<b>S. M. Kurtin, M. Buday, I. Kurup and B. A. Derfus:</b> Comparison of Matrix Vesicles Derived from Normal and Osteoarthritic Human Articular Cartilage	299 [353]
<b>T. Shinozaki and K. P. H. Pritzker:</b> Alkaline Phosphatase, Pyrophosphatase Activity, and Calcium Pyrophosphate Dihydrate Crystal Dissolution	300 [354]
<b>R. E. Devoll, W. T. Butler, L. W. K. Chung, G. J. Pinero, G. N. Thalmann and M. C. F.-Carson:</b> Osteopontin Expression and Distribution in Normal and Cancerous Human Prostate	301 [355]

## SESSION VII

*MINERALIZATION MECHANISMS I*

---

<b>F. Suzuki:</b> Roles of Cartilage Matrix Proteins, Chondromodulin-I and -II, in Endochondral Bone Formation: A Review	303 [357]
<b>L. N. Y. Wu, B. R. Genge, G. R. Sauer and R. E. Wuthier:</b> Characterization and Reconstitution of the Nucleational Complex Responsible for Mineral Formation by Growth Plate Cartilage Matrix Vesicles	309 [363]
<b>H. A. Pedrozo, Z. Schwartz, D. D. Dean, M. L. Wiederhold and B. D. Boyan:</b> Regulation of Statoconia Mineralization in <i>Aplysia californica</i> <i>In Vitro</i>	317 [371]
<b>D. A. Carrino, J. E. Dennis, T.-M. Wu, J. L. Arias, M. S. Fernandez, J. P. Rodriguez, D. J. Fink, A. H. Heuer and A. I. Caplan:</b> The Avian Eggshell Extracellular Matrix as a Model for Biomineralization	325 [379]
<b>D. D. Dean, Z. Schwartz, J. Schmitz, O. E. Muniz, Y. Lu, F. Calderon, D. S. Howell and B. D. Boyan:</b> Vitamin D Regulation of Metalloproteinase Activity in Matrix Vesicles	331 [385]
<b>B. A. Derfus, S. M. Kurtin, N. P. Camacho, I. Kurup and L. M. Ryan:</b> Comparison of Matrix Vesicles Derived from Normal and Osteoarthritic Human Articular Cartilage	337 [391]
<b>C. Rey, H.-M. Kim, L. Gerstenfeld and M. J. Glimcher:</b> Characterization of the Apatite Crystals of Bone and their Maturation in Osteoblast Cell Culture: Comparison with Native Bone Crystals	343 [397]

## ABSTRACTS

- B. Derfus, N. Mandel, N. Camacho and T. Schmid:** Articular Cartilage Matrix Vesicles are a Potential Nidus for Human Pathologic Biomineralization 351 [405]
- M. Goldberg, D. Septier, S. LéColle, L. Vermelin, CH. Ayanoglou, P. Bissila-Mapahou, J. P. Carreau and B. Thonemann:** Lipids and Pulp: Effects of EFAD and Studies on In Vitro Mineralization 352 [406]
- B. L. Kraus and M. A. Crenshaw:** Liposome Mediated Biomineralization: The Role of the Liposome 353 [407]
- M. Kobayashi, K. Kobayashi and T. Hoshino:** Formation of Hydroxyapatite Crystals in Culture Medium 354 [408]
- C. Shukunami, Y. Hiraki and F. Suzuki:** Calcification of Mouse Chondrogenic Cell-Line, ATDC5, *In Vitro* 355 [409]

## SESSION VIII

*MINERALIZATION MECHANISMS II*

- 
- A. L. Boskey:** Matrix Proteins and Mineralization: An Overview 357 [411]
- S. Albeck, L. Addadi and S. Weiner:** Regulation of Calcite Crystal Morphology by Intracrystalline Acidic Proteins and Glycoproteins 365 [419]
- E. P. Paschalis, O. Jacenko, B. Olsen, B. Decrombrughe and A. L. Boskey:** The Role of Type X Collagen in Endochondral Ossification as Deduced by Fourier Transform Infrared Microscopy Analysis 371 [425]
- G. Hunter and C. A. Weinert:** Inhibition of Proteoglycan Biosynthesis Decreases the Calcification of Chondrocyte Cultures 379 [433]
- H. A. Goldberg, K. J. Warner, M. J. Stillman and G. K. Hunter:** Determination of the Hydroxyapatite-Nucleating Region of Bone Sialoprotein 385 [439]
- J. T. Stubbs, III:** Generation and Use of Recombinant Human Bone Sialoprotein and Osteopontin for Hydroxyapatite Studies 393 [447]
- J. Bella, B. Brodsky and H. M. Berman:** Disrupted Collagen Architecture in the Crystal Structure of a Triple-Helical Peptide with a Gly → Ala Substitution 401 [455]

## ABSTRACTS

- J. Benton, S. P. Robins and T. J. Wess:** Influence of Collagen Organization on the Mineralization of Bone and Other Related Tissues 407 [461]
- C. Niyibizi, C. S. Visconti, K. Kavalkovich and J. J. Wu:** The Cartilage Types II, IX and IX Collagens are Present at Ligament Bone Junctions 408 [462]
- T. Sakae, Y. Kozawa, J. P. LeGeros and R. Z. LeGeros:** High Temperature Thermal Analysis of Several Types of Collagen 409 [463]
- T. van den Bos and W. Beertsen:** De Novo Mineralization of Alkaline Phosphatase- Complexed Collagen Implants in the Rat is Related to Serum Inorganic Phosphate 410 [464]

<b>M. Yamauchi, E. P. Katz, G. S. Chandler, H. Tanzawa and M. A. Crenshaw:</b> Turkey Leg Tendon has Three Post-Translational Type I Collagen Phenotypes	411 [46]
<b>A. L. Boskey, L. Spevak and W. T. Butler:</b> Dentin Sialoprotein Inhibits Hydroxyapatite Formation and Growth in a Gelatin Gel	412 [46]
<b>W. J. Landis, K. J. Hodgens, D. Berkery and C. H. Owen:</b> Three-Dimensional Immunocytochemistry of Osteopontin in Bone	413 [46]
<b>C. Robinson, J. Kirkham, R. C. Shore, G. M. Whitford, W. A. Bonass and S. J. Brookes:</b> Albumin: A Crystal Growth Modulator During Calcification	414 [46]
